EDUCATION

Barnard College of Columbia University   New York, NY
Bachelor of Arts, Major in Computer Science, Minor in East Asian Languages and Cultures   *May 2023*

RELEVANT EXPERIENCE

Bank of America   New York, NY
Technology Analyst Program - Software Engineer   *Jul. 2023 – Jan. 2024*
- Implemented message queues to facilitate communication between Shield, internal trade limits workflow tool, and FIS/TC, internal trade clearing application, to provide front-office risk teams with an interface for monitoring, accepting, or rejecting give-in trades for specific client accounts
- Integrated block/accept functionality into Shield's UI to validate client give-in trades coming from FIS/TC and the ability to block subsequent activity in case of an intraday breach
- Facilitated cross-functional team and stakeholder communication, overseeing feature development and implementation
- Ensured compliance of two applications with BOFA's information security policies, actively identifying and eliminating vulnerabilities and reporting them to relevant channels for remediation
- Tech Stack: Java(SpringBoot), SQL Oracle, IBM MQ, AMPS Queue, Jenkins, JFrog Artifactory, Autosys, Ansible

Angi   New York, NY
Software Engineer Intern   *Jun. 2022 – Aug. 2022*
- Improved the front-end Log-In/Authentication experience for customers submitting a review using ReactJS and Redux; Increased reviews volume by 20%
- Revamped Angi's current career's page by customizing its Job Board to integrate the Greenhouse API and increase applicant traffic by 25%
- Implemented JSON fetching and rendering for listing all jobs and retrieving an individual job; used TypeScript and Next.js
- Created reusable React components to redesign and develop the front-end of the career's homepage
- Tech Stack: React, JSX, Node.js, SQL, Scala, Docker, Postman, Jenkins, Kubernetes, AWS, Figma

Dotdash Meredith   New York, NY
Software Engineer Intern   *Jun. 2021 – Aug. 2021*
- Worked in Agile/Scrum framework to complete front-end relevant tickets for Investopedia.com using HTML, CSS, Javascript and Angular
- Refined Investopedia's Pattern Library and updated design components like buttons, labels, icons, colors and typography to help the team build efficient digital products
- Tech Stack: AngularJS, SQL, Jenkins, Kubernetes, AWS, Figma

PROJECTS & VOLUNTEER EXPERIENCE

Philly Truce | *Product Strategy, Product Roadmapping, Agile, Kanban, Jira, FigJam*
- Leading product strategy for mobile app and feature enhancements at Philly Truce, developing an incident-management platform to document and mitigate violent conflicts in and around Philadelphia schools
- Documenting requirements specifications through user stories, acceptance criteria, and UX deliverables
- Conducting usability heuristics, QA tests and validating upcoming deliverables with users through usability testing
- Facilitating sprint planning, sprint demo, and retrospective sessions with Product, UX and Engineering teams to boost efficiency in alignment with our product roadmap priorities

Marvel API | *Figma, JSX, React, Axios*
- Created a React application, following the principle of client-side fetching/rendering, using Axios that retrieves and displays data from the public Marvel Comics API
- Implemented browse/search functionality that allows users to search Marvel API resources like characters, comics and series
- Rendered results for each of the resource types using components and added links to their details

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, HTML, CSS, JSX, SQL (MySQL)
Frameworks & Libraries: jQuery, Flask Python, ReactJS
